DUTY OF DISCLOSURE

To comply with the duty of disclosure of 37 C.F.R. § 1.56, please provide any information, including any prior art, that **you, the inventor(s), or the assignee**, consider would be material to the examination of this application. Information is considered material if there is a substantial likelihood that an examiner would consider it important in deciding the patentability of the application. Please provide a copy of each prior art reference, especially if it is not a U.S. patent. This includes any prior art that already may be cited in the application.

If any such information exists, it should be submitted to the U.S. Patent and Trademark Office within three (3) months of the application filing date. Non-English language documents must be filed with a concise statement of their relevance to the invention. A known English language equivalent or a translation of at least the pertinent portions of a non-English language document should also be filed, if it is available.

The duty to cite material prior art also extends to prior art that **you, the inventor(s) or the assignee** may subsequently become aware of up to the time of issuance of the U.S. patent. This includes, for example, prior art cited during the prosecution of corresponding foreign applications that would be material to the examination of this application.

Please also identify for us each U.S. patent or pending patent application that **you, the inventor(s) or the assignee** are aware of that is related to the subject matter of this case. The files of such cases should be examined to locate any relevant prior art. Related applications and patents should be brought to the Examiner's attention because they may be potential or actual prior art references under 35 USC § 102(e) or raise an issue of double patenting.
